Additional Behaviours

Add

Triggers

Set up automated actions that start your build based on specific events, like code changes or scheduled times.

☐ Trigger builds remotely (e.g., from scripts)

☐ Build after other projects are built

Build periodically

Schedule

H/2 * * * *

Would last have run at Wednesday, April 30, 2025, 7:10:46 AM India Standard Time;
would next run at Wednesday, April 30, 2025, 7:12:46 AM India Standard Time.

☐ GitHub hook trigger for GITScm polling

☐ Poll SCM ☐

Environment

Configure settings and variables that define the context in which your build runs, like credentials, paths, and global parameters.

- ☐ Delete workspace before build starts
- ☐ Use secret text(s) or file(s) ☐
- ☐ Add timestamps to the Console Output
- ☐ Inspect build log for published build scans
- ☐ Terminate a build if it's stuck
- ☐ With Ant ☐

Build Steps

Automate your build process with ordered tasks like code compilation, testing, and deployment.

Execute Windows batch command ☐

Command

See [the list of available environment variables](#)

```
call run.bat
```

Advanced ☐

Add build step ☐

Post-build Actions

Define what happens after a build completes, like sending notifications, archiving artifacts, or triggering other jobs.

Add post-build action ☐
